

## Sanitary Process Components & Instrumentation

### SPXFLOW

#### >APV®

Provides a unique range of advanced technology product including pumps, valves, homogenizers, mixers and heat exchangers. Industry focused on food, beverage, dairy, and life sciences.

### SPXFLOW

#### >Waukesha Cherry-Burrell®

Supplier of component equipment including pumps, valve, heat changers, filters/strainers, & dispersion equipment.

### SPXFLOW

#### >Gerstenberg Schröder®

Comprises scraped surface heat exchanger technology, and emulsification equipment used for processing of (e.g.) margarine, butter, spreads, shortening, puff pastry, ice cream, mayonnaise, sauces, & dressings.

Global instrumentation company with instrumentation solutions for processors of food, beverage, and life sciences.

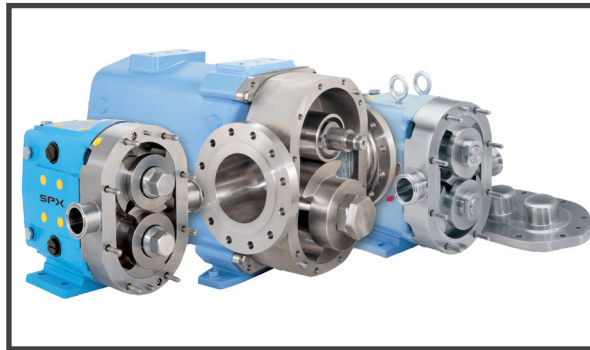

Develops and manufactures pumps and process equipment for food, poultry, meat, seafood, pharmaceutical, beverage, cosmetic, and biomedical industries.

## Additional Supported Manufacturers

## Certified Repair & Rebuild

### Pump

All pump repair and maintenance includes a complete evaluation report outlining current conditions, cause analysis summary and recommended changes. Cost of service and spare parts are compared to replacement of equipment to ensure the best value for the customer. Maintenance services cover both "wet end" and "gear end." Bench testing is performed prior to shipping to ensure a successful start-up.

### Valve

Valve services cover most manufactures of sanitary manual, single seat, and mixproof valves. Our service covers both the product and actuator sides of the valve. Prior to release, all equipment is actuated to ensure proper repair and successful installation.

Our service program cover individual valves or complete preventative maintenance programs.
